Our multi-disciplinary team of experts at the Comprehensive Aortic Program at MemorialCare Heart & Vascular Institute at Long Beach Medical Center offers specialized care including early detection, surgical intervention and long-term outpatient surveillance for aortic diseases.

Specialized Care for Aortic Patients

- Treating a broad range of aortic pathology including:
 - > Aortic aneurysm
 - > Aortic dissection
 - > Native aortic and prosthetic graft infections
 - > Congenital aortic disease (Marfan's syndrome, Loeys Dietz)
- Open and hybrid interventions:
 - > Complex valve sparing aortic replacement
 - > Hybrid arch and thoracoabdominal aortic aneurysm repair
 - > Percutaneous interventions for aortic dissection/transection
 - > Thoracic endovascular aortic repair (TEVAR)
 - > Endovascular repair of thoracoabdominal/abdominal aneurysms (EVAR)
- Outpatient aortic surveillance program:
 - > Surveillance with routine imaging
 - > Risk factor optimization
 - > Medical therapy

When you choose the Comprehensive Aortic Program, you get:

- Multi-disciplinary experts in aortic care.
- Ease of transfer — MemorialCare Access Center is a nurse-first model to ensure we support you in getting your patient to us or assist you in finding an alternative target designation for your patient.
- Elite level of care — According to *U.S. News & World Report*, Long Beach Medical Center is ranked among best hospitals in California.
